

WHAT IS IT

The Holographic box is a box that presents your product in a spectacular new way. With the Holobox you can create a virtual world around your product. In this world everything is possible. Through a special technique we create the illusion of a hologram. This hologram can interact with your product. This will make it seem like your product, presented in the box, is part of the animation. This gives a very interesting experience that makes your product stand out. Wherever the Holobox is placed, people will stop and watch. This gives your product the attention it deserves.

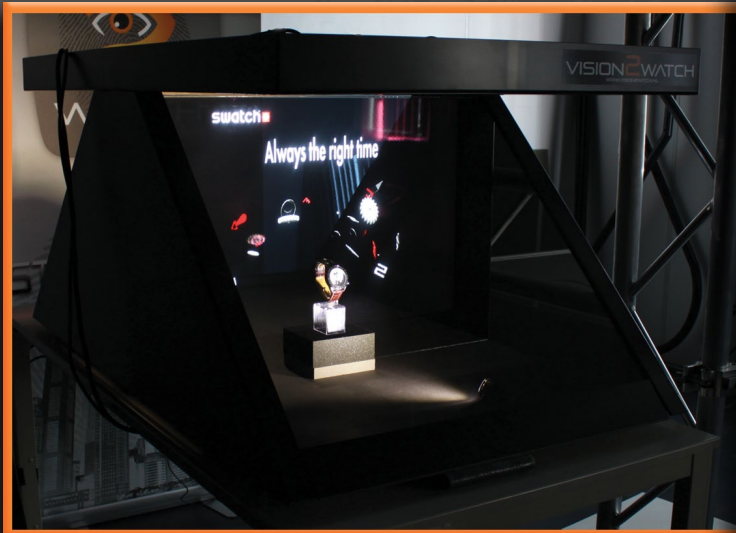

IN BRIEF

HOW IT WORKS

The holographic box works with projection, which isn't limited by size. To create the illusion of a real hologram we project a custom made animation onto a transparent screen. Only the projection can be seen clearly which gives your audience the illusion of a true hologram.

- A guaranteed eye-catcher
- Brings up the highlights of your product
- Your potential customers are entertained by the Holobox while they get to know your product
- Simple and quick to install at almost any location
- Vision2Watch uses only the best equipment for your project
- Flexible in the appearance of the box and in the content
- Durable
- Available from 15.6 to 50 inches, larger

THE POSSIBILITIES

The holographic box is easy to set up and requires little maintenance. Shopping windows, shops, fairs, you name it; almost any place can be adorned by this box. The content is created as desired. With the Holobox you can highlight your product 24 hours a day.
