

WHAT IS IT

Our interactive foil gives you a new and interactive tool to reach your customers even more effectively. With the Touch Foil we can transform every window and glass into an interactive display which can be used in many ways.

HOW IT WORKS

Our lightweight Touch Foil can be applied directly to a window or a glass sheet and then a rear projection screen or LCD can be mounted behind the touch foil to create a through-window/glass touch experience. The Vision2Watch Touch Foil can be mounted using either a permanent or a removable fixing method allowing the touch unit to be moved to another location if required. There are no external components required with the Vision2Watch Touch Foil so the installation is completely safe behind the window.

IN BRIEF

- A guaranteed eye-catcher
- Interaction with clients 24/7
- Thin, flexible and entirely transparent material
- Can be attached to almost every smooth surface
- Easy and quick to install at almost any location
- Extremely durable
- Available from 35 up to 134 inch sheets, larger available on request
- Can be permanent or removable
- Both for sale and for rent
- Stable software, projection screens and beamers

THE POSSIBILITIES

The content of the Touch Foil is digitally stored. With that you can always edit the content. The Touch Foil occupies very little space and doesn't take sight away, is lightweight, durable and can be placed at almost every location. It is designed to grab and hold the attention of potential customers. This gives you the best option to communicate with your customers. 24/7 and at any location.
