

WHAT IS IT

Vision2Watch can work magic and turn your shop window into an interactive display. This encourages customers to 'window shop' 24 hours a day. Passersby can for example browse what is available on the estate agent's books or look at a clothing shop's collection with ease. With Yourwindow you will attract the attention of passersby and your window can now be used as an extension of the building.

HOW IT WORKS

A transparent foil or panel is mounted to the inside of the window. The projection is shown on the outside. The projection is interactive; the panel reacts to the touch of the user standing outside the shop. In this manner a passerby can search for the price of a property or choose their search criteria from a menu. The projection is at a high resolution and great picture quality. The display is lightweight, durable and transparent so no sight will be removed.

IN BRIEF

- Interaction with clients 24/7
- A guaranteed eye-catcher
- Thin, flexible and transparent material
- Doesn't take sight away
- Easy and quick to install at almost any location
- Durable
- Available from 35 up to 134 inch sheets, larger available on request
- Can be permanent or removable
- Both for sale and for rent
- Stable software, projection screens and beamers

THE POSSIBILITIES

Shop windows are of course not the only places where interactive messages can be shown. Other possible locations to give you an idea are; in shops, at exhibitions, waiting rooms, during meetings or at the reception desk.
